

AMAN VARMA

Ghaziabad, India +91-6306572504 | amangurauli@gmail.com | [linkedin.com/in/aman-v-697771345](https://www.linkedin.com/in/aman-v-697771345) | github.com/Amanvarma2231

PROFESSIONAL SUMMARY

B.Tech Computer Science graduate with 6 months of experience as a Python Developer, specializing in backend development, REST APIs, SQL, ETL/data pipelines, and data validation. Strong foundation in API testing, automated testing, debugging, databases, Git, and CI/CD, with hands-on experience building cloud-deployed applications.

SAP CERTIFICATIONS — SAP LEARNING

Exploring SAP Cloud ERP • Cloud Onboarding for SAP Cloud ERP • Developing a Universe: Fundamental Concepts of SAP BusinessObjects Information Design Tool • Developing a Universe: Advanced Concepts of SAP BusinessObjects Information Design Tool (Aug 2026)

CORE TECHNICAL SKILLS

Languages: Python, SQL, Java, C/C++, JavaScript, HTML, CSS, HTTP

Testing & Automation: Playwright, Python Test Automation, API Testing, ETL/Data Validation, Unit Testing

SAP: SAP Cloud ERP, SAP BusinessObjects (Universe Design), SAP Clean Core, RISE & GROW with SAP

AI / Data: LLM Integration, NLP, TF-IDF, Machine Learning, Information Retrieval

Data Engineering: ETL/ELT, Data Pipelines, Data Cleaning & Validation, Data Warehousing

Backend & APIs: Flask, Fast APIs, Django, REST APIs, Node.js, Express.js

Databases: MySQL, PostgreSQL, MongoDB, SQLite

Cloud & DevOps: GCP Fundamentals, Docker, Git/GitHub, CI/CD (GitHub Actions), Automated Testing

PROFESSIONAL EXPERIENCE

Python Developer Intern

Feb 2026 – Present

Druidot Consulting (OPC) Pvt. Ltd. | Remote

- Developed Python-based validation checks and automated tests for database-driven workflows, improving data quality and reducing manual verification effort.
- Built and maintained Python REST APIs (Flask/FastAPI) powering database-driven workflows, measured by improved data-access reliability, by applying analytical, standards-based API design.
- Owned data-pipeline debugging and validation, measured by consistent data quality before records reached production, by implementing structured checks across MySQL/MongoDB stores.
- Designed database schemas supporting AI-driven application features, measured by improved query performance, by applying data-modeling best practices to 1,000+ live records.
- Shipped changes safely via Git/GitHub and CI/CD, measured by reduced manual release effort, by automating build-test-deploy.

PROJECTS

NLPCRM — AI-Powered CRM Platform

Python, Flask, MySQL/SQLite, Qwen 2.5 (LLM), REST APIs, OAuth 2.0 | GitHub: github.com/Amanvarma2231/NLPCRM | Demo: npcrm-1.onrender.com

- Architected 25+ REST API endpoints across contacts, AI/NLP, email, and webhook modules, measured by full CRUD coverage, using a normalized Python/Flask + MySQL/SQLite schema.
- Integrated an LLM (Qwen 2.5 via Hugging Face) to auto-extract lead details from unstructured text, measured by automated 0–10 lead scoring, through custom NLP extraction and sentiment analysis.
- Implemented production-grade security — session auth, CSRF protection, Google OAuth 2.0, rate limiting — measured by zero unauthorized-access incidents, across WhatsApp/Email/Teams data sync.

Content Desk — AI Content & Data Processing Platform

Python, Flask, Tkinter, SQLite, TF-IDF, REST APIs, GitHub Actions | GitHub: github.com/Amanvarma2231/Content-Desk | Demo: content-desk.onrender.com

- Designed a shared core engine consumed by both a Flask web dashboard and a Tkinter desktop app, measured by zero duplicated business logic, by centralizing data-access modules.
- Built an SEO-scoring crawler and TF-IDF near-duplicate detector, measured by automated Keep/Refresh/Consolidate/Remove recommendations with confidence scoring, using an LLM-driven content pipeline.
- Ensured pipeline correctness with 26 automated unit tests in GitHub Actions CI, measured by consistent build reliability, persisting all data to SQLite with CSV export.

EDUCATION

B.Tech, Computer Science & Engineering — NITRA Technical Campus, AKTU, Uttar Pradesh

May 2022 – June 2026

CGPA: 7.12/10

ADDITIONAL CERTIFICATIONS & ACTIVITIES

Python Programming Certification (Infosys) • JPMorgan Chase & Co. Quantitative Research Job Simulation (Forage) • Cyber Security Fundamentals (Udemy)

Presented "Adaptive Residual-Energy Threshold LEACH for Performance & Energy Efficiency" at NGAISL-2026, HRIT University (Apr 2026).
